Specifications

Frame: Frame stocks are harvested from certified sustainable sources and constructed of 100% Solid European Beech Hardwood. All parts are cut, machined and assembled in the U.S.A. All stress joints are either mortise and tenon or double doweled. Corner blocks are glued and screwed in place using pva adhesive.

Seat: 1.8 Density 35lb. compression Ultracell HR Polyurethane foam. 3/4 oz. blended fiber overlay. Tight seat upholstered to a CNC precision routed hardwood plywood seat board with internal edges rounded to prevent webbing wear. Covered with high resilient, elastic sheet webbing.

Back: 1.1 Density 22lb. compression Ultracell HR Polyurethane foam. 3/4 oz. blended fiber overlay.

Fabric: COM (Customer's Own Material)

2.0 yards

Actual amount may vary based on special fabric requirements and roll width.

Finish: Chair is available in a wide variety of standard finishes. Custom finishes are available upon request.

Finish Specification: Frames are finished in a 14 step process using a catalyzed conversion varnish, sealer and top coat. The conversion varnish finish offers superior moisture and chemical resistance and surface strength. Additional information is available regarding the finish process and the full features and benefits of conversion varnish.
